

Product Information sheet

EM Agriton System®.

Sustainable agriculture for a profitable farm

Organo Fresh **PLUS** TMR®

Suppresses heating and spoilage of feed mixes with the added **PLUS** which acts as a bird deterrent.

Organo Fresh **Plus** TMR®

A liquid ready to use solution based on Organic acids to prevent heating and spoilage in animal feed mixes. The **PLUS** component exudes a spicy herbal aroma which the birds don't like. Whilst being completely harmless to the birds Organo Fresh **Plus** can have a reducing effect on bird farm populations.

Improves keeping qualities of feed especially in warm weather.

EM-TMR heat reducer is a product based on fermentation by microbes. Prevents mycotoxin contamination.

TMR contains a mixture of organic acids and alcohols and natural herbal components. Organo Fresh TMR is organic certified, the added **PLUS** is approved as an animal feed flavoring.

Organo Fresh also contains a 'live' yeast extract.

Application per Ton:

Dilute 2 Ltrs in 10 Ltrs water and add to mixer wagon during mixing. For best results pour the diluted Organo Fresh **Plus** in the mixer with the first two components in the mix.

A sprayer can also be used to apply the product properly at the TMR.

It is very important that the TMR is divided properly. Use 1 Ltr per ton as a maintenance dose.

The effectivity of Organo Fresh TMR is based on the low pH (2.8-2.9) which promotes a preserving effect whilst enhancing the feed conversion rate. This liquid solution naturally stabilises feed mixes improving the keeping qualities of feed, especially in warm weather and can improve the herds feed intake.

The natural acidic composition makes it totally harmless for man, animal and machinery. Non corrosive.

Available in:
20 L, 200 L, 1000 L
